

# **Diagram Documentation**

### ExoPlanet

| Field                | Description | Туре        | Default | Other |
|----------------------|-------------|-------------|---------|-------|
| planetIDNum          |             | int         |         | PK    |
| planetName           |             | varchar(50) |         |       |
| explanetAttributesID |             | int         |         | FK    |
| stellarAttributesID  |             | int         |         | FK    |
| habitableID          |             | int         |         | FK    |

### ExoPlanetSizeAttributes

| Field                | Description | Туре         | Default | Other |
|----------------------|-------------|--------------|---------|-------|
| explanetAttributesID |             | int          |         | PK    |
| planetRadius         |             | float        |         |       |
| planetMassKG         |             | float        |         |       |
| planetMassEarth      |             | float        |         |       |
| planetMassJupiter    |             | float        |         |       |
| planetType           |             | varchar(255) |         |       |
| dictID1              |             | int          |         | FK    |
| dictID2              |             | int          |         | FK    |
| dictID3              |             | int          |         | FK    |
| dictID4              |             | int          |         | FK    |
| dictID5              |             | int          |         | FK    |

### ExoPlanetStellarAttrributes

| Field                | Description | Туре  | Default | Other |
|----------------------|-------------|-------|---------|-------|
| stellarAttributesID  |             | int   |         | PK    |
| StellarMass          |             | float |         |       |
| planetaryOrbitPeriod |             | float |         |       |
| stellarRA            |             | float |         |       |
| stellarDec           |             | float |         |       |
| dictID1              |             | int   |         | FK    |
| dictID2              |             | int   |         | FK    |
| dictID3              |             | int   |         | FK    |
| dictID4              |             | int   |         | FK    |

### ExoPlanetHabitable

QuickDBD-export Page 1 of 2

| Field           | Description | Туре         | Default | Other |
|-----------------|-------------|--------------|---------|-------|
| habitableID     |             | int          |         | PK    |
| confirmed       |             | bool         |         |       |
| kepplerType     |             | varchar(255) |         |       |
| distanceToEarth |             | float        |         |       |
| dictID1         |             | int          |         | FK    |
| dictID2         |             | int          |         | FK    |
| dictID3         |             | int          |         | FK    |

## ExoPlanetDictionary

| Field        | Description | Туре         | Default | Other |
|--------------|-------------|--------------|---------|-------|
| dictionaryID |             | int          |         | PK    |
| term         |             | varchar(30)  |         |       |
| definition   |             | varchar(255) |         |       |
